FOR IMMEDIATE RELEASE

**T6 TECHNOLOGY CART TO DEBUT AT HIMSS08  
T6 COW Solution Features Improved Cable Management, Sleek New Aesthetic**

**NEW YORK, March 23, 2009** — Humanscale Healthcare will unveil the T6 Point-of-Care Technology Cart at the HIMSS09 Conference & Exhibition. A follow-up to Humanscale's hailed T5 Technology Cart, the T6 features improved cable management and sleek new aesthetics while teaming unmatched mobility and comfort with a high-performance power system for both laptops and PCs.

Available exclusively through EnovateIT, a leading provider of mobile wireless solutions and a premier global systems integrator for the healthcare industry, Humanscale's T line of carts provide the first truly ergonomic healthcare computer-on-wheels solution. Extensive research and interviews with regular COW users led to the development of key features of the T5 and T6, including comfort for a wide range of users, ease of mobility, maximum maneuverability in confined spaces, and long-lasting power.

Designed to meet the ergonomic requirements of 99% of users in both sitting and standing postures, the T6's keyboard, monitor, and work surfaces are each independently adjustable for maximum user comfort. Humanscale's patented one-touch adjustable keyboard support technology ensures healthy typing and mousing, and dynamic height adjustability operated via foot pedal allows for instant overall changes in the cart's height.

Offering one of the smallest footprints available, the T6 is designed to ensure effortless maneuverability in tight corridors, around hospital beds, and in other small spaces.

The T6's energy-conscious and quick-charging internal power system stays cool without a fan, which helps limit the spread of contagions. Available with a 40-amp/hour battery and three outlets, the T6 provides up to twelve hours of continuous use between chargings, depending on the hardware in use. The T6 also features a unique remote power management system that relays battery information to a central location within a healthcare facility, allowing remote monitoring of the device to maximize run time and battery life.

Designed by the Humanscale Design Studio, the T6 contains more than 50% recycled materials and is itself 95% recyclable. Its unique features and sleek design aesthetic are among the many details that complete this innovative cart solution.

### **About Humanscale Healthcare**

Humanscale Healthcare provides a wide range of work tools that enhance the comfort and safety of computer users in healthcare environments. A division of Humanscale Corporation, the world's largest provider of ergonomic solutions, Humanscale Healthcare brings a unique perspective on human factors to the healthcare market.

Humanscale products are based on the belief that when design solves a functional problem as simply and elegantly as possible, the resulting form will be honest and timeless—a philosophy that's served the company well. Humanscale was named among I.D. Magazine's top ten "enterprises that help push design forward" along with other design-driven companies including Nike and BMW. And Humanscale's Liberty seating line was featured as one of the most important design innovations of the past three years in the National Design Triennial at the Smithsonian's Cooper-Hewitt, National Design Museum.

### **Environmental Statement**

Humanscale is committed to environmental sustainability and continually strives to design, engineer and manufacture products that:

- Weigh less, requiring less raw material
- Use fewer parts and manufacturing processes
- Contain a high percentage of recycled content
- Contain a high percentage of recyclable content

Humanscale is also a proud supporter of World Wildlife Fund, and our founder and CEO, Robert King, has served on WWF's National Council since 1999.

### **About EnovateIT, LLC**

Headquartered in Troy, Michigan, EnovateIT is a leading provider of mobile wireless solutions and a premier global systems integrator for healthcare. With more than 30,000 installations in over 500 healthcare facilities, EnovateIT provides secure cost effective mobile solutions for medication delivery systems, computerized physician order entry, clinical documentation, and electronic medical records systems. EnovateIT not only offers the products to facilitate wireless information solutions, but also the services and support to make it a reality. Visit EnovateIT at [www.enovateit.com](http://www.enovateit.com).
