FOR IMMEDIATE RELEASE

**HUMANSCALE HEALTHCARE'S T5 WINS BIG IN 2007
International Design Awards Recognize Point-of-Care Technology Cart**

NEW YORK, October 18, 2007 — The 2007 International Design Awards has named Humanscale Healthcare's T5 Point-of-Care Technology Cart the Industrial and Life Science Design First Category Winner. The T5 also earned first prize in the iDA Medical/Scientific Machinery category. The artists and entrepreneurs who created and judge iDA strive to recognize and celebrate visionary designers in architecture and interior, fashion, product, and graphic design. Winners were selected from nearly 1,000 applicants from about 50 countries and will be featured in the forthcoming 2007 iDA design book.

The T5 provides the first truly ergonomic healthcare technology cart solution for both laptop computers and PCs. Extensive research and interviews with regular point-of-care cart users led to the development of the key features of the T5, aimed at excelling where similar cart solutions fall short, including comfort for a wide range of users, maximum mobility in confined spaces, and long-lasting power.

Designed to meet the ergonomic requirements of 99% of users in both sitting and standing postures, the T5's keyboard, monitor, and work surface are each independently adjustable for maximum user comfort. Humanscale's patented one-touch adjustable keyboard support technology ensures healthy typing and mousing, while a gas cylinder operated by a foot pedal allows for easy overall changes in the T5's height. All adjustments can be made simply and intuitively.

The T5 combines ultra light weight with one of the smallest footprints available to ensure easy mobility in tight corridors, around hospital beds, and other small spaces. Additional mobility features include push/pull handles on three sides and high-quality casters that transition easily between carpeted and hard surfaces.

The T5's energy-conscious and quick-charging internal power system stays cool without a fan, which helps limit the spread of contagions. Available with a 40-amp/hour battery and three AC outlets, the T5 provides eight hours of continuous use between chargings, and recharges 75% in just one hour. A visible power gauge and audible alarm alerts users when power is diminishing, while an optional 10-foot retractable power cable system, conveniently positioned at the same height as hospital outlets, can be easily accessed for charging and cord management.

-MORE-

Designed by the Humanscale Design Studio, the T5 contains more than 50% recycled materials and is itself 95% recyclable. Unique security locks, an inset work area, optional storage drawers, and a sleek design aesthetic are also among the many details that complete this innovative cart solution.

Previously, the award-winning T5 earned a silver medal at the 2007 Spark Design Awards, and a Bronze EID Award from *appliance DESIGN* magazine's 20th Annual Excellence in Design Competition, and the Grand Prize for Workplace Productivity Solutions in the 2005 Innovations competition presented by *Buildings* magazine.

The T5 is available for purchase through EnovateIT, a leading provider of mobile wireless solutions and a premier global systems integrator for the healthcare industry. About Humanscale Healthcare

Humanscale Healthcare designs and manufactures ergonomic products to provide comfortable, safe and efficient work environments for caregivers. A division of Humanscale Corporation, the world leader in ergonomic workplace tools, Humanscale Healthcare brings a unique perspective on human factors to the healthcare market.

Humanscale products are based on the belief that when design solves a functional problem as simply and elegantly as possible, the resulting form will be honest and timeless—a philosophy that's served the company well. Humanscale was named among I.D. Magazine's top ten "enterprises that help push design forward" along with other design-driven companies including Nike and BMW. And Humanscale's Liberty seating line was featured as one of the most important design innovations of the past three years in the National Design Triennial at the Smithsonian's Cooper-Hewitt, National Design Museum.

Environmental Statement

Humanscale is committed to environmental sustainability and continually strives to design, engineer and manufacture products that:

- Weigh less, requiring less raw material
- Use fewer parts and manufacturing processes
- Contain a high percentage of recycled content
- Contain a high percentage of recyclable content

Humanscale is also a proud supporter of World Wildlife Fund, and our founder and CEO, Robert King, has served on WWF's National Council since 1999.

About EnovateIT, LLC

Headquartered in Troy, Michigan, EnovateIT is a leading provider of mobile wireless solutions and a premier global systems integrator for healthcare. With more than 30,000 installations in over 500 healthcare facilities, EnovateIT provides secure cost effective mobile solutions for medication delivery systems, computerized physician order entry, clinical documentation, and electronic medical records systems. EnovateIT not only offers the products to facilitate wireless information solutions, but also the services and support to make it a reality. Visit EnovateIT at www.enovateit.com.
